LEES

Bigelow

 DURKAN

A style for every taste. A brand for every space.

As the world's leading producer and distributor of quality flooring, we offer highly reputable brands with nearly limitless possibilities. Our commercial brands—Karastan, Lees and Bigelow—create the perfect trio of flooring choices by offering product solutions for all markets and all price points. Whichever you choose, you can count on industry-leading style, top performance, superior sustainability, winning value and unmatched service.

Bigelow

Bringing sensible style to the floor, Bigelow is available in broadloom and modular, as well as woven. Beautiful. Versatile. Affordable. Bigelow delivers superior quality and design while helping you stay within your budget.

SUSTAINABILITY THAT WORKS

The Mohawk Group is committed to sustainability that works. Our goal is to lead our industry by traveling the path of doing what's right for our customers, the environment and the communities where we live and work. Greenworks—our industry-leading set of sustainability strategies—supports our ability to provide quality products and superior value to our customers while also providing real solutions that measurably reduce our impact on the planet.

**SUSTAINABILITY THAT WORKS...
FOR YOU, OUR COMMUNITIES
AND OUR PLANET.**

SUSTAINABILITY THAT WORKS

OUR GREENWORKS INITIATIVE IS BASED
ON THESE THREE KEY COMMITMENTS:

ACTIONS, NOT JUST WORDS:

We are less concerned with talking about our intentions and more concerned about real programs that are viable for the long term. We've achieved significant improvements in the sustainability and performance of our products, as well as dramatic reductions in our footprint in terms of water and power consumption, and even greater reductions in the amount of waste we generate.

MAKING A REAL DIFFERENCE:

We focus on programs and practices that will have the greatest possible impact on the environment and our communities over the long term. That means our efforts must be economically sustainable, helping us to not only protect the environment, but provide products that perform at competitive price points as well.

THIRD-PARTY VERIFICATION:

We are committed to leading the industry in transparency. So we manufacture to the industry's most demanding standards, and we will not make a claim unless it's been verified by the most credible third-party sources we can find.

SUSTAINABILITY THAT WORKS

Our three-pronged strategic approach to “Sustainability That Works” focuses on our processes, our products and our people:

OUR PROCESSES:

As a corporation, we have made significant strides in reducing our manufacturing footprint—both with reductions in inputs and in the recycling and reuse of waste. We’ve also set aggressive reduction targets over the next 10 years.

25% Reductions by the Year 2020

As a global flooring manufacturer and responsible corporate citizen, Mohawk Industries has identified four areas—reductions in energy use, water use, greenhouse gas emissions and material diversion—to improve upon by 25 percent each by the year 2020.

All Manufacturing Facilities are ISO 14001 and ISO 9001 Certified

Through innovative new processes, technologies, and products, we’re leading the way towards more environmentally-friendly manufacturing.

Greenworks Recycling Center

Opened in 2007, our GreenWorks Center facility processes all types of post-consumer carpet fibers—including product from competitors—and manufactures plastics that can be used in new products like carpet, furniture, and automobile industry parts.

ReCover Carpet Recycling Program

Each year, an estimated 6 billion pounds of carpet waste is sent to landfills across North America. Our ReCover program helps reduce this waste by allowing customers to dispose of their old carpet without having to send it to a landfill.

Sampling and Communications

We have developed remarkable innovations in carpet sampling that include new technologies, new tools, and new approaches to carpet design, sampling and communications. Now, even in this arena, we are leading the industry with our sustainability innovations.

OUR PRODUCTS:

At The Mohawk Group, we believe that the most effective way to implement real sustainability is to build it in from the very beginning—starting with our product design. Using the best materials and designing innovative, durable products not only ensures a higher level of sustainability from the outset, but also gives us a great head start in addressing environmental issues at other stages of the product life cycle.

500+ Product Lines With Recycled Content

We increase the sustainability of our products by incorporating pre- and post-consumer recycled content.

SUSTAINABILITY THAT WORKS

Renewable Materials

We aim to reduce our dependence on petrochemicals wherever possible. We're now using carpet fibers made from the starch in corn kernels to make our Smart-Strand Contract fibers and using soy oil to make backing systems.

NSF 140 Certified—Largest Product Platform Offering

The Mohawk Group proudly offers Silver, Gold and Platinum NSF 140 certified products across the majority of our modular, broadloom and woven styles.

CRI Green Label Plus—Every Product Certified

All of our Mohawk Group carpets and adhesives pass the CRI Green Label Plus certification.

OUR PEOPLE:

Our commitment to sustainability that works extends well beyond producing sustainable products and reducing our manufacturing footprint. It also means investing in the health, safety and professional development of our people and the communities where we live, work and play.

Investing in Our Employees

We provide a wide range of personal and professional growth opportunities to the people who drive Mohawk's success—our employees. We have been ranked as high as 9th in *Training* magazines' annual listing of the Top 125 training organizations in the country.

A Safe and Healthy Workforce

At The Mohawk Group, safety is of equal importance to quality, production and cost management. Our safety record in North America ranks among the best in the industry.

Susan G. Komen

We created our own "Specify for a Cure" program to support "Komen for the Cure" in fighting breast cancer. To date we have donated \$3.7 million dollars to this worthwhile cause.

Habitat for Humanity

The Mohawk Group is very active with Habitat to realize the goal that every man, woman and child should have a decent, safe and affordable place to live.

United Way

Our participation in various United Way programs across our more than 200 facilities allows us to support the widest possible range of charitable organizations in our local communities.

FIBER TECHNOLOGIES

As one of the largest flooring manufacturers in the world, Mohawk has access to every fiber system in our industry. Each of our brands select the best, most appropriate fiber for our products based on market application, design intent, traffic level, and budget, to ensure that you always get the right fiber for your facility. Exceptional fade and stain resistance is also built into many of these fibers. And why? Because carpets with high performance qualities need to be replaced less often, which is good for you and good for the environment.

SmartStrand Contract

SmartStrand Contract from The Mohawk Group is a breakthrough innovation in fiber system technology, and is made with DuPont™ Sorona® renewably sourced polymer. DuPont™ Sorona® is the brand name for triexta, a new fiber class designated by the FTC as having characteristics that clearly distinguish it from all other fiber classes. SmartStrand Contract has inherent stain and bleach protection, exceptional color capabilities, a luxurious feel and unique environmental advantages. It has been engineered specifically for commercial applications and is perfect for sustainable design. SmartStrand Contract complies with LEED Credit MR 6.0 for rapidly renewable materials.

The DuPont Oval Logo, DuPont™ and Sorona® are trademarks or registered trademarks of E. I du Pont de Nemours and Company and are under license to Mohawk.

duracolor®

Duracolor

Originally patented by The Mohawk Group in 1991, Duracolor's historical performance is unsurpassed. With more than 300 million yards installed, Duracolor has proven it's value by delivering longer product lifecycles that reduce the impact to your bottom line and to the planet. Not only does Duracolor resist 99% of all common stains, 96% of those stains can be removed with water alone. It is not a topical treatment that can wash off or wear away with heavy use. Its ability to resist stains is engineered into its molecular structure and has been proven effective in millions of yards of demanding installations. No other stain resistance technology comes close to Duracolor's record of success. In fact, the stain resistance is such a permanent part of Duracolor that we guarantee it for life. Enduring color, endless stain protection and never-ending beauty are the advantages of this exceptional fiber.

Colorstrand

Colorstrand® is our premium branded 100% Solution Dyed Nylon (SDN) with 25% pre-consumer recycled content. We've been making Colorstrand SDN for over 10 years and its ability to resist, hide and release dirt have won over tough-to-please customers in every high traffic, extreme-wear installation you can imagine. With over 100 fresh colors that offer design aesthetics unsurpassed by other solution dyed fibers, Colorstrand also provides excellent resistance to color loss from harsh chemicals and ozone degradation.

With decades of experience and over 450 million square yards of high performance backed carpet installed, The Mohawk Group leads the industry in providing the best possible carpet backing solutions available. All backing systems for our modular, broadloom and woven styles are engineered to give you maximum performance and sustainability. Not only do many of our backing systems contain recycled content and certified EPP (environmentally preferable products), they all carry a non-prorated performance warranty.

Unibond Flex & Unibond Flex Bloc

This broadloom backing provides enhanced durability, installation flexibility and sustainability. This combination of benefits is made possible by Unibond Flex's patented matrix construction (US Patent No. 5,962,101) where the carpet fiber is tufted through both the primary and secondary backings. It is then backed with our Advanced Thermoset Co-Polymer which is made with 33% post-consumer recycled content. Unibond Flex is the only high-performance broadloom, tufted product that may be stretched in or direct glued, based on your specific needs. Unibond Flex Bloc provides all the benefits of Unibond Flex with the added feature of an effective liquid barrier. Both are backed by our Lifetime Limited Warranty.

EcoFlex™ ICT

Our EcoFlex ICT modular backings with 35% pre-consumer recycled content are now standard across all the Karastan, Lees and Bigelow offerings. This is an ultra dense modular backing system engineered to provide superior performance, with guaranteed dimensional stability. EcoFlex ICT is CRI Green Label Plus certified, Gold level certified in accordance with NSF/ANSI 140 and may contribute to LEED certifications.

EcoFlex™ NXT

A model of sustainable design, EcoFlex NXT is a PVC-free backing that is up to 40% lighter than similar PVC products. This innovative new backing system also incorporates a minimum of 35% post-industrial recycled content by total product weight, is impervious to moisture damage from spills and water extraction cleaning and comes with a comprehensive lifetime, non-prorated warranty against cupping, doming, dishing, edge ravel or loss of tuft bind. EcoFlex NXT is CRI Green Label Plus certified as well as NSF 140 Gold certified.

EcoFlex™ AIR

This is the premiere cushion back carpet tile for performance and comfort. It's advanced composite structure provides a stable modular platform while delivering superior resiliency and maximum comfort underfoot. EcoFlex AIR also contains both post-consumer and post-industrial recycled content. The result is a modular system that is ergonomically effective and environmentally friendly. EcoFlex AIR is CRI Green Label Plus certified and also complies with LEED Credit MR 4.0 for recycled content and MR 6.0 for rapidly renewable materials.

ONLINE TOOLS

We understand that technology leadership means market leadership. So we're passing our high tech advantage on to you—taking a lead in our industry so you can be a leader in yours. Our suite of innovative online tools lets you explore different design options, work faster, spec more accurately, reduce your costs and get better end results.

QuickShip

Offering more colors and styles than ever before, our In Stock and Q10 QuickShip programs provide instant access to hundreds of ready-to-order carpet products with significantly reduced lead times. Our QuickShip program will save you and your clients valuable time in the design and delivery process. In Stock styles ship upon order entry and credit approval and Q10 styles ship within 10 days of order entry and credit approval.

Up to 2,000 Yards; no holds/reserves on QuickShip styles.

Ready to Ship

Our Ready-to-Roll and Ready-to-Tile product selection tools allow you to quickly see which of our products are currently available to be shipped immediately.

Online Product Catalog

This virtual product catalog lets you instantly view samples online instead of having to wait for them to be delivered. Just visit our site, save your selections as a pdf, and print them as needed. It's fast, easy, and environmentally friendly.

LEED Plus Calculator

This free, confidential, online tool makes your green decisions easier. You can search, evaluate and document the eco-attributes of all our Mohawk Group products. Our LEED Plus Calculator can also help you complete many of today's environmental rating system submission forms.

Drag and Fly

Our online library of carpet tile images is a designer's dream come true. You get free access to thousands of properly scaled, color-accurate product images that you can bring into your 3D renderings or CAD designs. In seconds, you'll have perfect renderings that normally would have taken hours to create.

Visualizer

This convenient, virtual tool allows you to visualize our modular carpet in prebuilt room scenes. Start by browsing our extensive libraries of Karastan, Lees and Bigelow modular product images. Select a sample, along with any installation method, and see how it looks in the different environment options we provide.
